Career Objectives

As a recent graduate with a Computer Science and Engineering degree, I am enthusiastic about launching my career as a software engineer. I am eager to apply my foundational knowledge in programming languages, algorithms, and software development methodologies to contribute to innovative projects and gain hands-on experience in the industry. I am committed to continuous learning, staying updated on emerging technologies, and collaborating effectively with team members to solve complex problems. I aim to develop my skills and expertise while making meaningful contributions to the organization's success.

Skills

- **Programming Languages:** JavaScript, C.
- **Technologies:** Html, Css, Tailwind Css.
